

The background is a light blue gradient with several realistic water droplets of various sizes scattered across the surface. Some droplets are in the top left, some in the bottom right, and others are smaller and more numerous in the center and bottom left.

MARMONTIS

SPLIT

SPLIT - CROATIA

They say that Split „is the center of the world” – maybe its not, but it is certainly the center of the Adriatic.

MARMONTIS d.o.o.

- Marina equipment and construction,
- Providing equipment for ports and mooring places,
- Representing foreign and local equipment producers,
- Everything for marinas and boat manipulation in them,
- Marketing, import and export.

MarMontis has participated
in providing equipment for 87%
of all the ports on the Adriatic.

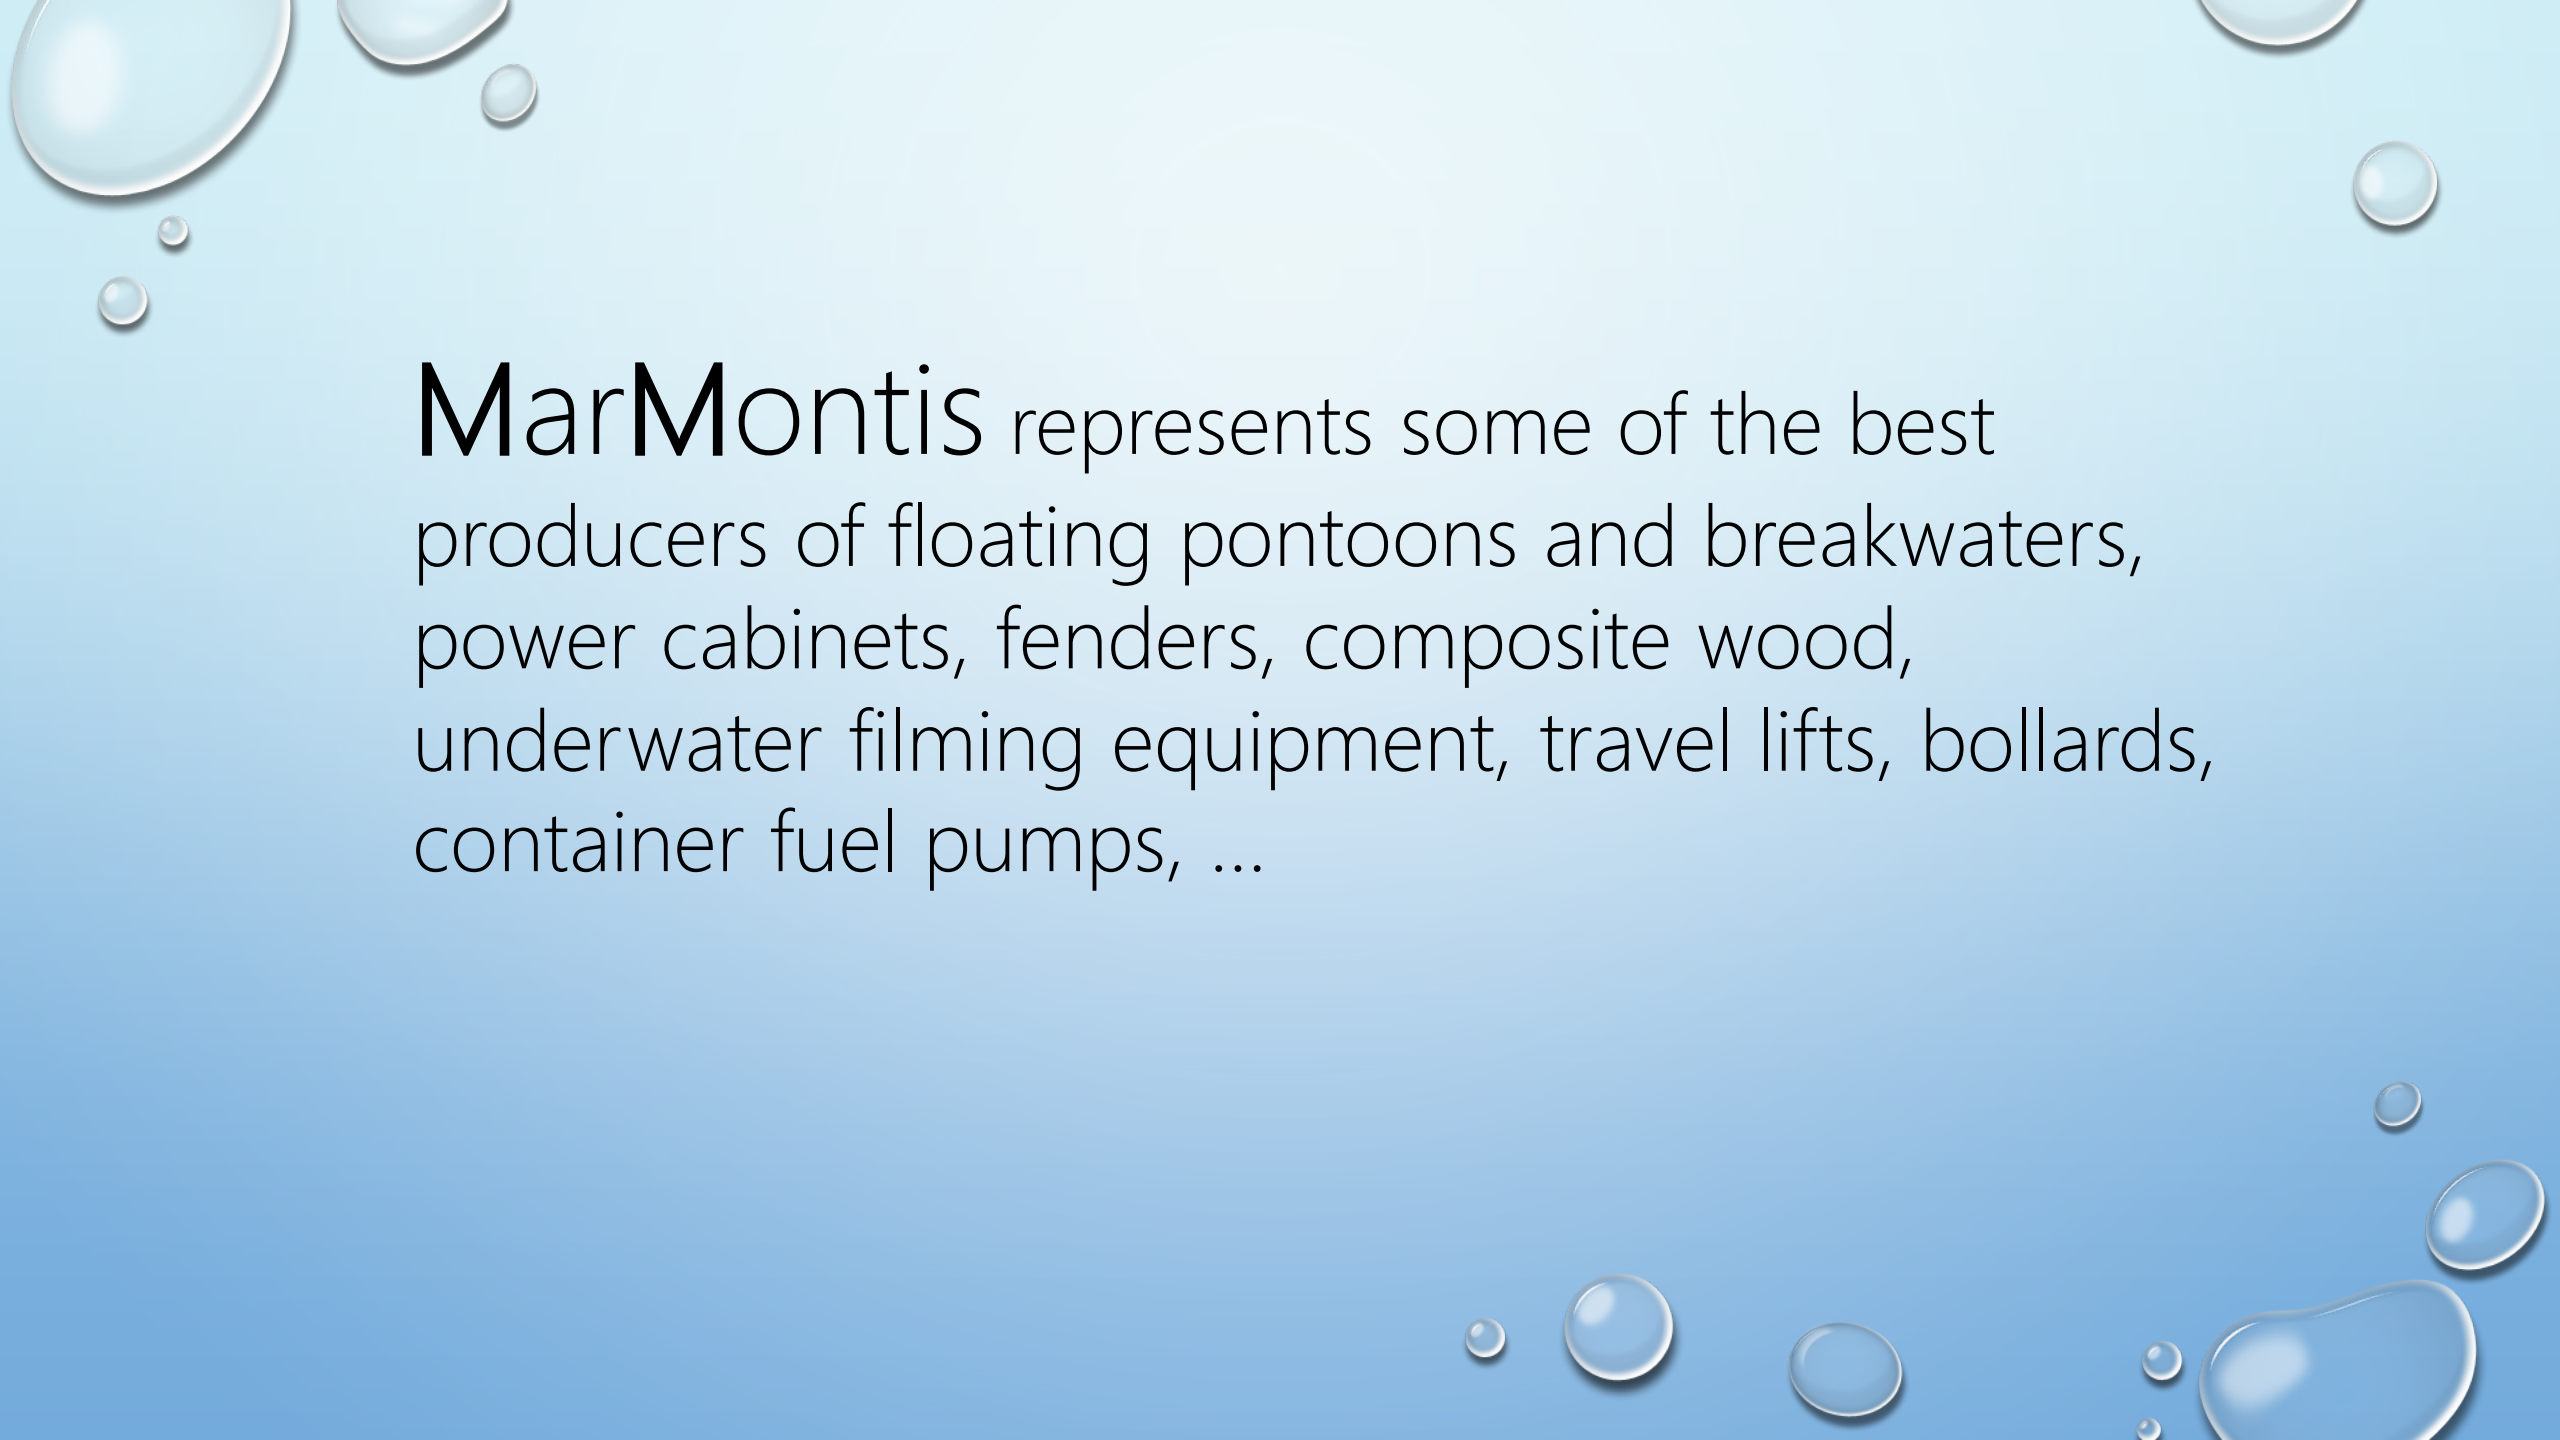

St. Peter Pier - Split

Ploče Port

Ferryboat landing- Ploče

MarMontis represents some of the best producers of floating pontoons and breakwaters, power cabinets, fenders, composite wood, underwater filming equipment, travel lifts, bollards, container fuel pumps, ...

We prefer concrete
pontoons and breakwaters.

Power cabinets are produced by some of the world leading companies.

Fenders meet the highest quality requirements and have English certificates.

Composite wood lasts forever,
does not require maintenance, can
be in the color of your choosing
and is ideal for marinas and pool
areas.

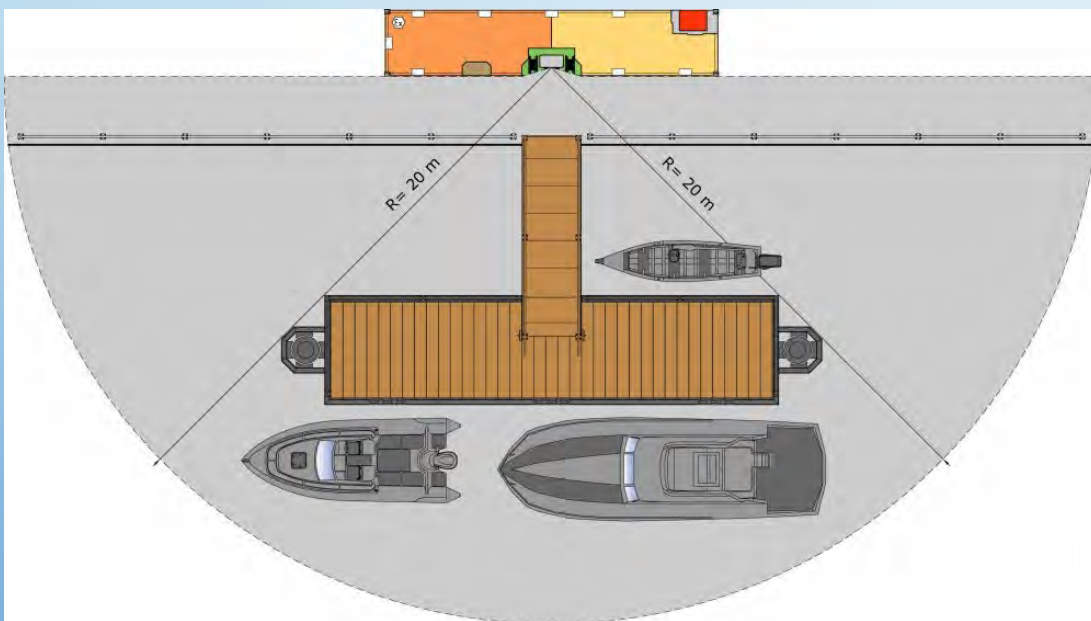

Some marinas provide
maintenance for their clients – on
dry land of course.
This means lifting the boats out of
the water, ...

Once on land, the boat needs to be taken to the maintenance area.

Sails are a marvelous
invention, but without fuel, ...

Underwater work, anchoring floating pontoons
and breakwaters, ...
Remotely!

Soon:

MarMontis & Bellingham

Bellingham Marine

Over 2.000.000 m²
of pontoons on five
continents in 80 years.

Bellingham Marine made a name with the **Unifloat** system of floating pontoons – a system of custom-made elements, each suited to the specific location and its conditions.

The Bellingham Wave Attenuator system is just as popular. Floating elements are designed for each location separately.

MARMONTIS d.o.o.

With a partner like Bellingham Marine, we are even stronger. Count on us if you are building anything on sea, or need equipment for your marina, port, landing, or mooring space. Since 1994 little was done on the Adriatic without us. Find out why.
